Your 3D Tester's airbag:

Your 3D Tester has the best possible protection through mechanical end stops within the probing unit. In the event of a crash, they absorb all destructive forces before the measuring unit and prevent damage in the measuring unit of your 3D Tester.

No other measuring equipment gives you the possibility to measure the rotating centre so simply, precisely and directly in your lathe.

Y=0 corresponds to the rotating centre. As a result, you ensure the best possible processing, achieve long lifetime and preserve best surfaces.

Y axis
Here you see Y=0

X axis
Here you see X=0

Without any further calculation, you measure your tools to the centre of the spindle, respectively X=0.

Also in Z, you can measure all tools, taking into account the length offset in your machine.
